Subject Index

B – Books
LE – Letter to the Editor
O – Outlook
ff – Entry continues on the following pages

A
Acanthamoeba castellani
fatty acid synthesis 184 O
Acetylcholinesterases (AChE), nematode 406ff
inhibition 408ff
multiple molecular forms 407ff
Acquired immune deficiency syndrome (AIDS) 161
leishmaniasis co-infection 293
African swine fever 164
Age
and cryptosporidiosis resistance 26ff
Albendazole
giardiasis chemotherapy 412ff
Alphavirus infection
antibody-mediated clearance 76 O
Ancylostoma caninum
host finding/recognition 5 O
Anopheles spp
chromosome inversions 114ff
Anopheles gambiae
genetic engineeering 117
Antibodies
non-protective, *Plasmodium yoelli* 369ff
Antigen crossreactions
malaria vaccine development, and 121ff
P. falciparum 118ff
Antigen-presenting cells
schistosomiasis 200ff
T-cell co-stimulatory molecules 202ff
Antigens
irradiation-modified 359ff
surface-associated, nematodes 8ff
see also Surface antigens
Anthelmintics
resistance to 330
Anti-oncosphere antibodies
Taenia spp 182
AO filter system
fluorescence microscopy 70ff
Apicomplexan parasites
rhoptries 28ff
Arboviruses
infection barriers, in mosquitoes 124ff, 126ff
mosquito-borne, vector specificity/competence 123ff
replication 150
vector infection routes 123ff
Artemisinin 252
Artifical insemination
disease transmission 161
Ascaris lumbricoides
immune response 111
Ascaris suum
mitochondria respiratory chain 155ff
Asexuality 291
Atovaquone 253
ATP
drug-stimulatable hydrolysis 396 O
Australia
Health Service 107 B
Autoimmune disease
Ly-1 B cells 357 O
Avermectin
faecal residue effects 255ff

B
Babesia bovis
attentuated vaccine lines 22ff
genetic analysis 22
recombinant vaccine development 23
strain diversity and variation, vaccine use effects 21ff
Bacillus Calmette-Guérin
and TNF 323ff
Bacillus sphaericus
vector control 364ff
Bacillus thuringiensis sp. *israelensis*
vector control 364ff
B-cell deficiency
and *Plasmodium yoelii* infection 369
Bednets
pyrethroid-impregnated, protection quantification 347ff
Biological species concept 208ff
alternatives to 209ff
Biomphalaria glabrata
genetics, and *Schistosoma* infection 171ff
Blood-sucking insects 215 B
Brucella spp
sexual transmission 161

C
Caenorhabditis elegans
acetylcholinesterase genes 408
cuticlin 7ff
cuticular collagens 7
genetic transformation 344ff
genome sequence 149, 153ff, O, 154 O
as parasitic nematode model 6ff
surface-associated antigens 10ff
Campylobacterium foetus
and fertility in cows 163
Cattle breeding
for gastrointestinal nematode resistance 330ff
$CD4^+$
lymphokine profiles 5 O
$CD8^+$
lymphokine profiles 5 O
Centromeres
Leishmania spp 194
CFTR
plasma membrane recycling 259 O
Chagas disease
chemotherapy 367ff, LE
vector control 221ff
Chemoprophylaxis
malaria 61ff, 367ff, LE
Chemoprophylaxis, malaria
effectiveness 64
risk–benefits 65ff
toxicity 63ff, 66
Chemotherapy
antifibrotic 277
Chagas disease 367ff, LE
giardiasis 412ff
leishmaniasis 293ff
malaria 252ff, 283ff
and membrane permeability 283ff
Opisthorchis viverrini 88ff
China
parasitology research 150ff
Chitinases
trypanosomatid 273 LE, 367 LE
Chlamydia psittaci
infection in koalas 163
Chloride channels
P-glycoprotein-associated 184 O
Chloroquine
resistance 183ff
specificity 183ff
Tetrahymena pyriformis autophagy and 184ff,O
Cholangiocarcinoma
and *Opisthorchis viverrini* 87ff
Chromosome healing
telomerase primer specificity 5 O
Chromosomes
evolution, *Leishmania* spp 197ff
Leishmania spp 192ff
structure, *Leishmania* spp 194ff
yeast artificial 228
Chronotherapy
malaria 167 LE
Climate
and fascioliasis 266ff
and malaria transmission 37
